No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 7,

TYPE: PRT
ORGANISM: Homo sapiens
CREAUNE:
NAME/KEY: MOD RES
COCATION: (30)
OTHER INFORMATION: The arginine residue at position 30 is modified so as to replace
CTHER INFORMATION: the terminal carboxyl group with an amine.
Sequence 1, Application US/10769080
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Galloway, John A
APPLICANT: Galloway, John A
TITLE OF INVENTION: Glucagon-Like Insulinotropic Peptides, Compositions and Methods
TITLE OF INVENTION: Glucagon-Like Insulinotropic Peptides, Compositions and Methods
TITLE OF INVENTION: 010/02326
CURRENT APPLICATION NUMBER: US/10/769,080
CURRENT APPLICATION NUMBER: US/10/769,080
CURRENT PILING DATE: 2000-05-18
